DETAILED ACTION

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the slide elements length greater than a width, claim 4, and the resilient guide shoe and slide elements, claim 10, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 6, 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuwabara.

Kuwabara has guide rail 12 with slideways at top and bottom of both left and right sides, guide shoe 13 with two slide elements at top and two slide elements at bottom projecting left and right.

As to claim 3, the bottom of the shoe slides at the bottom of the rail and is centrally positioned.

As to claim 6, the top elements are convex and the upper slideways are concave.

Art Unit: 3612

Following up on claim 3, the two top elements and the bottom of the guide shoe are arranged in a triangular orientation, claim 11, at a corner of the triangle, claim 12.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kuwabara.

Formation of a shoe of greater length than width is common knowledge in this art for linear sliding stability.

Applicant may seasonally challenge, for the official record in this application, this and any other statement of judicial notice in timely manner in response to this office action. Please specify the exact statement to be challenged. Applicant is reminded, with respect to the specific challenge put forth, of the duty of disclosure under Rule 56 to disclose material which is pertinent to patentability including claim rejections challenged by applicant.

6. Claim 9 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kuwabara.

The shoe and slide elements of Kuwabara appear to be one-piece. Molding is a process step not treated in a product claim (MPEP 2113).

7. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kuwabara in view of Webasto, DE 3813049.

It would have been obvious to one of ordinary skill to provide in Kuwabara a resilient shoe and elements as taught by Webasto in order to engage the rail uniformly.

Allowable Subject Matter

8. Claims 5, 7, 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Regner is cited to show concave/convex shoe/rail.
